

Investor Presentation

MARCH 2024

A **BRIGHTER WAY** TO INVEST IN GOLD®

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION AND NON-IFRS MEASURES

Except for the statements of historical fact contained herein, the information presented constitutes “forward-looking statements”, within the meaning of the U.S. Securities Act of 1933, the U.S. Securities Exchange Act of 1934, the Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation, concerning the business, operations and financial performance and condition of Sandstorm Gold Ltd. (“Sandstorm” or the “Company”). Forward-looking statements include, but are not limited to statements regarding performance and expectations including Sandstorm’s current year guidance and long-term outlook, which are based on public forecasts and other disclosure by the third-party owners and operators of our assets or on the Company’s assessment thereof including certain estimates based on such information; expectations regarding financial strength, trading liquidity, and capital markets profile; the future price of gold, silver, copper, iron ore and other metals, the estimation of mineral reserves and resources, realization of mineral reserve estimates; the timing and amount of estimated future production, including changes to production guidance; the offer and sale of Common Shares under the at-the-market equity program (the “ATM Program”), including the timing and amounts thereof, the use of any proceeds from the ATM Program; and statements with respect to Sandstorm’s normal course issuer bid (“NCIB”) and the number of Common Shares that may be purchased under the NCIB.

Forward-looking statements are made based upon certain assumptions and other important factors that, if untrue, could cause the actual results, performances, or achievements of Sandstorm to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Sandstorm will operate in the future, including the receipt of all required approvals, the price of gold and anticipated costs. Certain important factors that could cause actual results, performances or achievements to differ materially from those in the forward looking statements include, amongst others, failure to receive necessary approvals, changes in business plans and strategies, market conditions, share price, best use of available cash, gold and other commodity price volatility, discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries, mining operational and development risks relating to the parties which produce the gold Sandstorm will purchase, regulatory restrictions, activities by governmental authorities (including changes in taxation), currency fluctuations, the global economic climate, dilution, share price volatility and competition. Forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause the actual results, level of activity, performance or achievements of Sandstorm to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: the impact of general business and economic conditions, the absence of control over mining operations from which Sandstorm will purchase gold, other commodities or receive royalties from, and risks related to those mining operations, including risks related to international operations, government and environmental regulation, actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined, risks in the marketability of minerals, fluctuations in the price of gold and other commodities, fluctuation in foreign exchange rates and interest rates, stock market volatility, as well as those factors discussed in the section entitled “Risks to Sandstorm” in Sandstorm’s annual report for the financial year ended December 31, 2023 and the Company’s annual information form dated March 23, 2023 available at www.sedarplus.ca. Although Sandstorm has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Sandstorm does not undertake to update any forward-looking statements that are contained or incorporated by reference, except in accordance with applicable securities laws.

Sandstorm has included certain performance measures in this presentation that do not have any standardized meaning prescribed by International Financial Reporting Standards (“IFRS”), which may include: (i) total sales, royalties, and income from other interests, (ii) attributable gold equivalent ounce, (iii) average cash cost per attributable gold equivalent ounce, (iv) cash operating margin, and (v) cash flows from operating activities excluding changes in non-cash working capital. Total sales, royalties and income from other interests is a non-IFRS financial measure and is calculated by taking total revenue which includes sales and royalty revenue, and adding contractual income relating to royalties, streams and other interests excluding gains and losses on dispositions. The Company presents Total Sales, Royalties and Income from other interests as it believes that certain investors use this information to evaluate the Company’s performance and ability to generate cash flow in comparison to other streaming and royalty companies in the precious metals mining industry. Attributable gold equivalent ounce is a non-IFRS financial ratio that uses total sales, royalties, and income from other interests as a component. Attributable gold equivalent ounce is calculated by dividing the Company’s total sales, royalties, and income from other interests, less revenue attributable to non-controlling shareholders for the period, by the average realized gold price per ounce from the Company’s gold streams for the same respective period. The Company presents Attributable Gold Equivalent ounce as it believes that certain investors use this information to evaluate the Company’s performance in comparison to other streaming and royalty companies in the precious metals mining industry that present results on a similar basis. Average cash cost per attributable gold equivalent ounce is calculated by dividing the Company’s cost of sales, excluding depletion by the number of attributable gold equivalent ounces. The Company presents average cash cost per Attributable Gold Equivalent ounce as it believes that certain investors use this information to evaluate the Company’s performance and ability to generate cash flow in comparison to other streaming and royalty companies in the precious metals mining industry who present results on a similar basis. Cash operating margin is calculated by subtracting the average cash cost per attributable gold equivalent ounce from the average realized gold price per ounce from the Company’s gold streams. The Company presents cash operating margin as it believes that certain investors use this information to evaluate the Company’s performance and ability to generate cash flow in comparison to other streaming and royalty companies in the precious metals mining industry that present results on a similar basis. Cash flows from operating activities excluding changes in non-cash working capital is a non-IFRS financial measure that is calculated by adding back the decrease or subtracting the increase in changes in non-cash working capital to or from cash provided by (used in) operating activities. The Company presents cash flows from operating activities excluding changes in non-cash working capital as it believes that certain investors use this information to evaluate the Company’s performance in comparison to other streaming and royalty companies in the precious metals mining industry that present results on a similar basis. For the most recent numerical reconciliation of the non-IFRS financial measures described above, refer to the section “Non-IFRS and Other Measures” in the Company’s most recent MD&A, which is available on SEDAR+ at www.sedarplus.ca. The presentation of these non-IFRS financial measures is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these non-IFRS financial measures differently. All figures in US dollars unless otherwise stated.

Hundreds of Royalties. One Investment.

Gold Focused

High-Quality, Long Life Mines

Built-in Growth

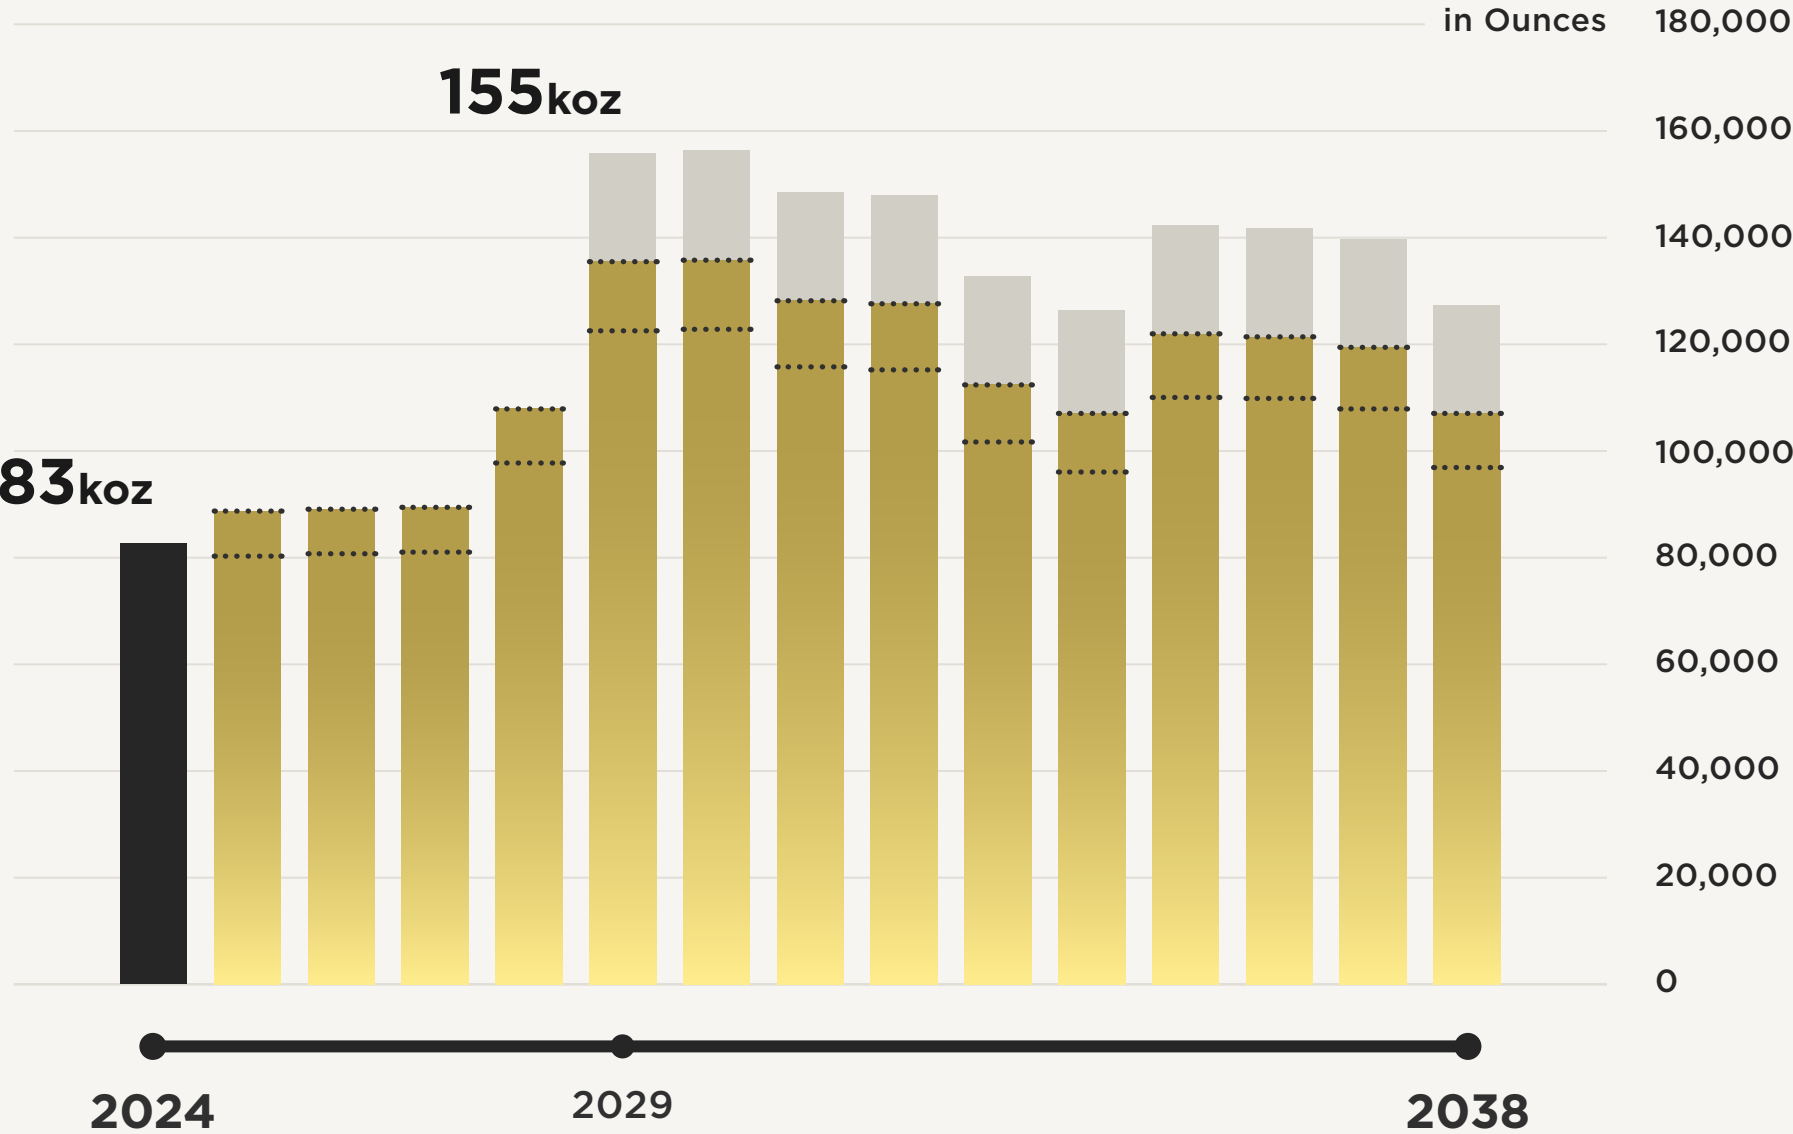

Growing and Sustainable Production

Increasing cash flow to well over **\$200M** per year¹

ATTRIBUTABLE GOLD EQUIVALENT PRODUCTION²

- 2024 Production Guidance Midpoint
- Estimated Production Range
- MARA Stream Option

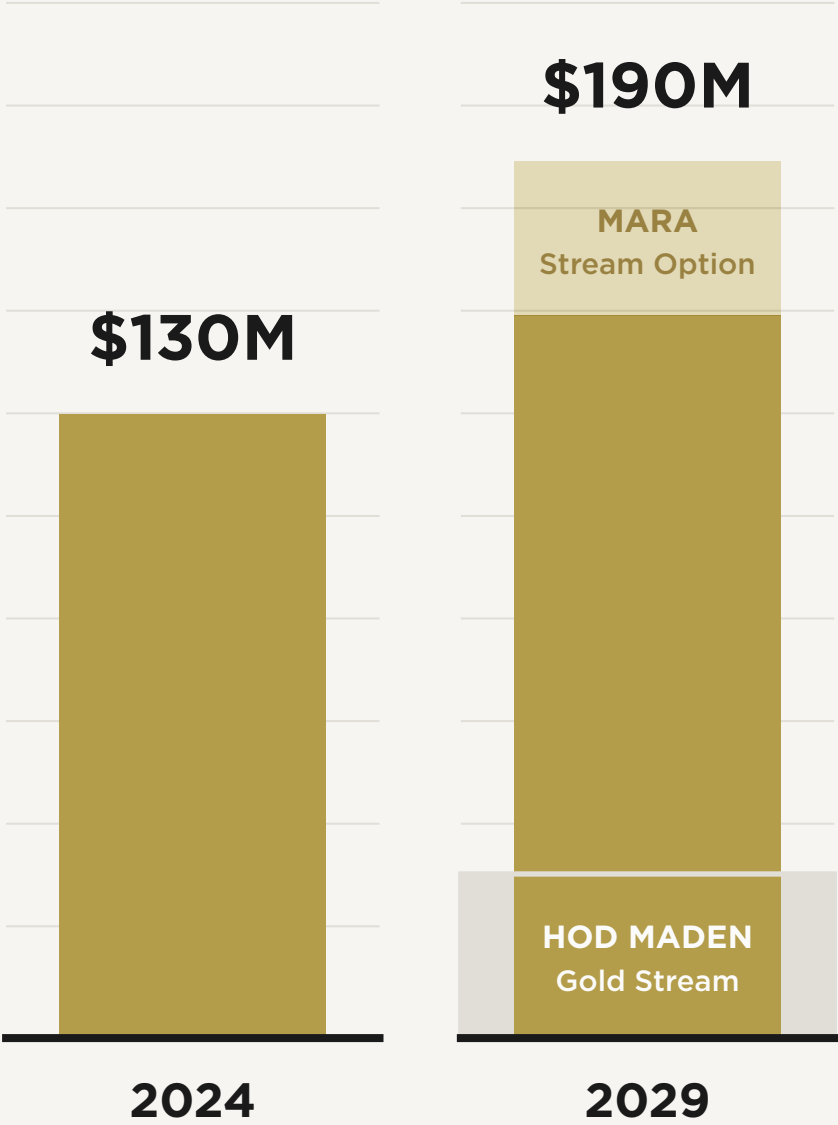

1. USD Based on expected cash flows from operating activities attributable to the Company's operating segment excluding changes in working capital, cash from Horizon Copper Debentures, and the exercise of the Company's MARA Stream Option.

2. Gold equivalent production and other related contractual cash flows. MARA Stream Option is based on expected average annual attributable production, and is subject to conversion decision.

PORTFOLIO CASH FLOWS¹
in US\$ Millions

Built in Cash Flow Growth

Gold	Silver	Copper
\$1,800/oz	\$23/oz	\$3.90/lb

1. Cash flows from operating activities attributable to the Company’s operating segment excluding changes in working capital and corporate G&A. MARA Stream Option is based on cash flows from expected attributable production, and is subject to conversion decision and contractual payment.

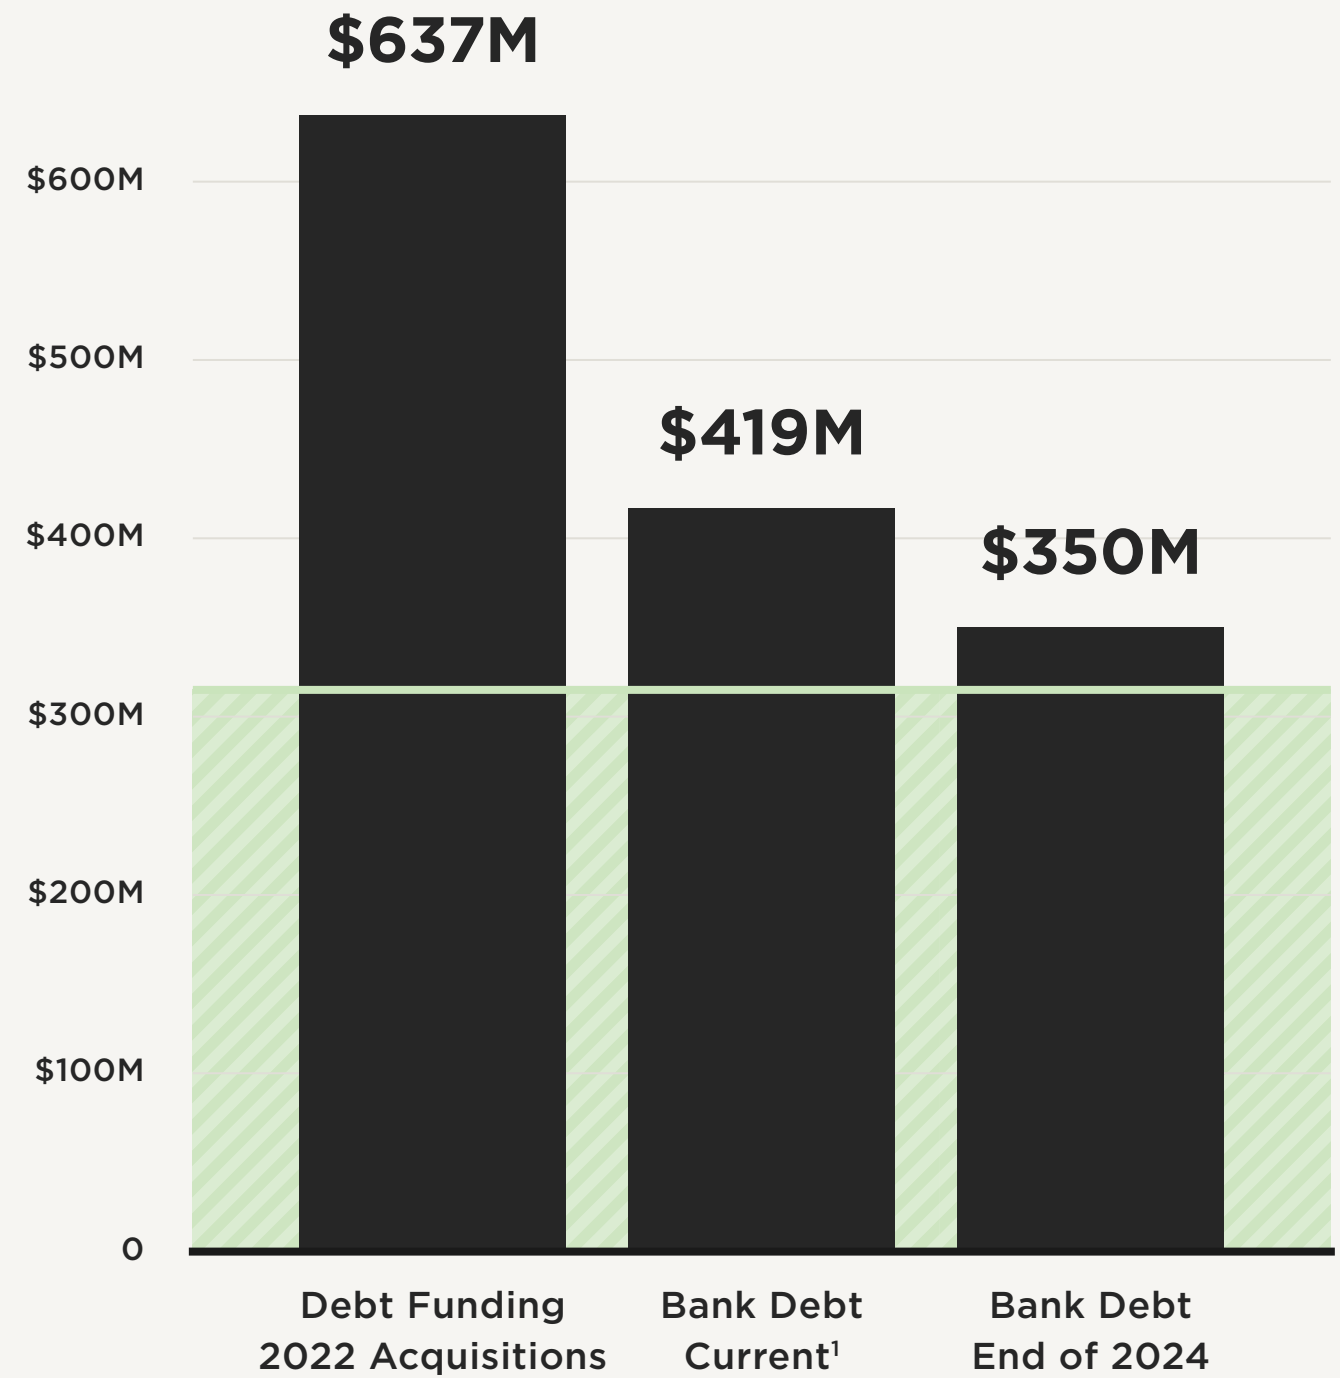

↑ Incremental Cash Flows from higher commodity prices

Commodity Price Leverage

Gold	Silver	Copper
↑ \$2,200/oz	↑ \$25/oz	↑ \$5.00/lb

1. Cash flows from operating activities attributable to the Company's operating segment excluding changes in working capital and corporate G&A. MARA Stream Option is based on cash flows from expected attributable production, and is subject to conversion decision and contractual payment.

Debt Repayment

Including minimum \$40M of non-core asset sales² by the end of 2024

Sandstorm holds approx. **\$240** million in loans to mining companies and **\$75** million in equity investments³

1. Bank debt as at February 16, 2024.
2. Estimated value from non-core asset sales to be used toward debt repayment. See the Company's press release dated September 28, 2023 for details.
3. Approximate value of investments as at Decemeber 31, 2023.

Sandstorm's Future is in Construction

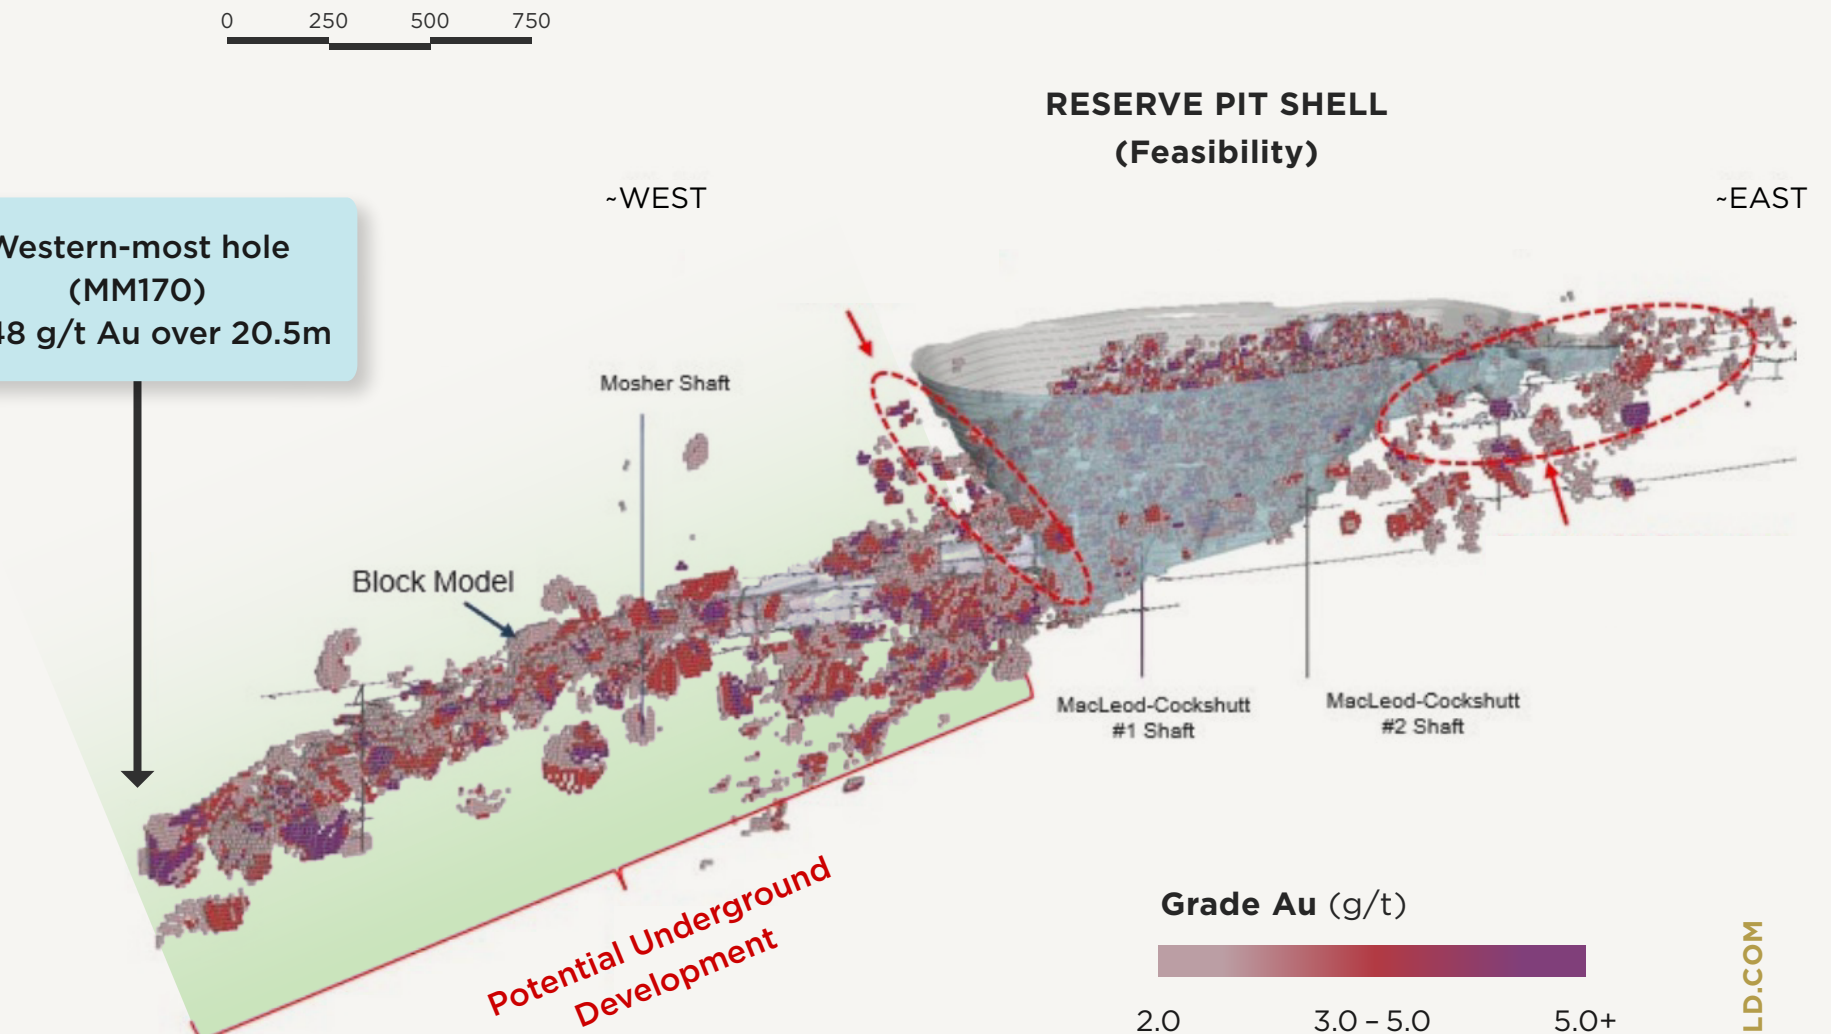

Greenstone

Equinox Gold Corp.

One of Canada's Largest Open-Pit Gold Mines

- › On track to pour gold in H1-24
- › 400koz gold per annum in first five years
- › Potential throughput expansion and/or underground mine not included in current mine economics

Western-most hole
(MM170)
18.48 g/t Au over 20.5m

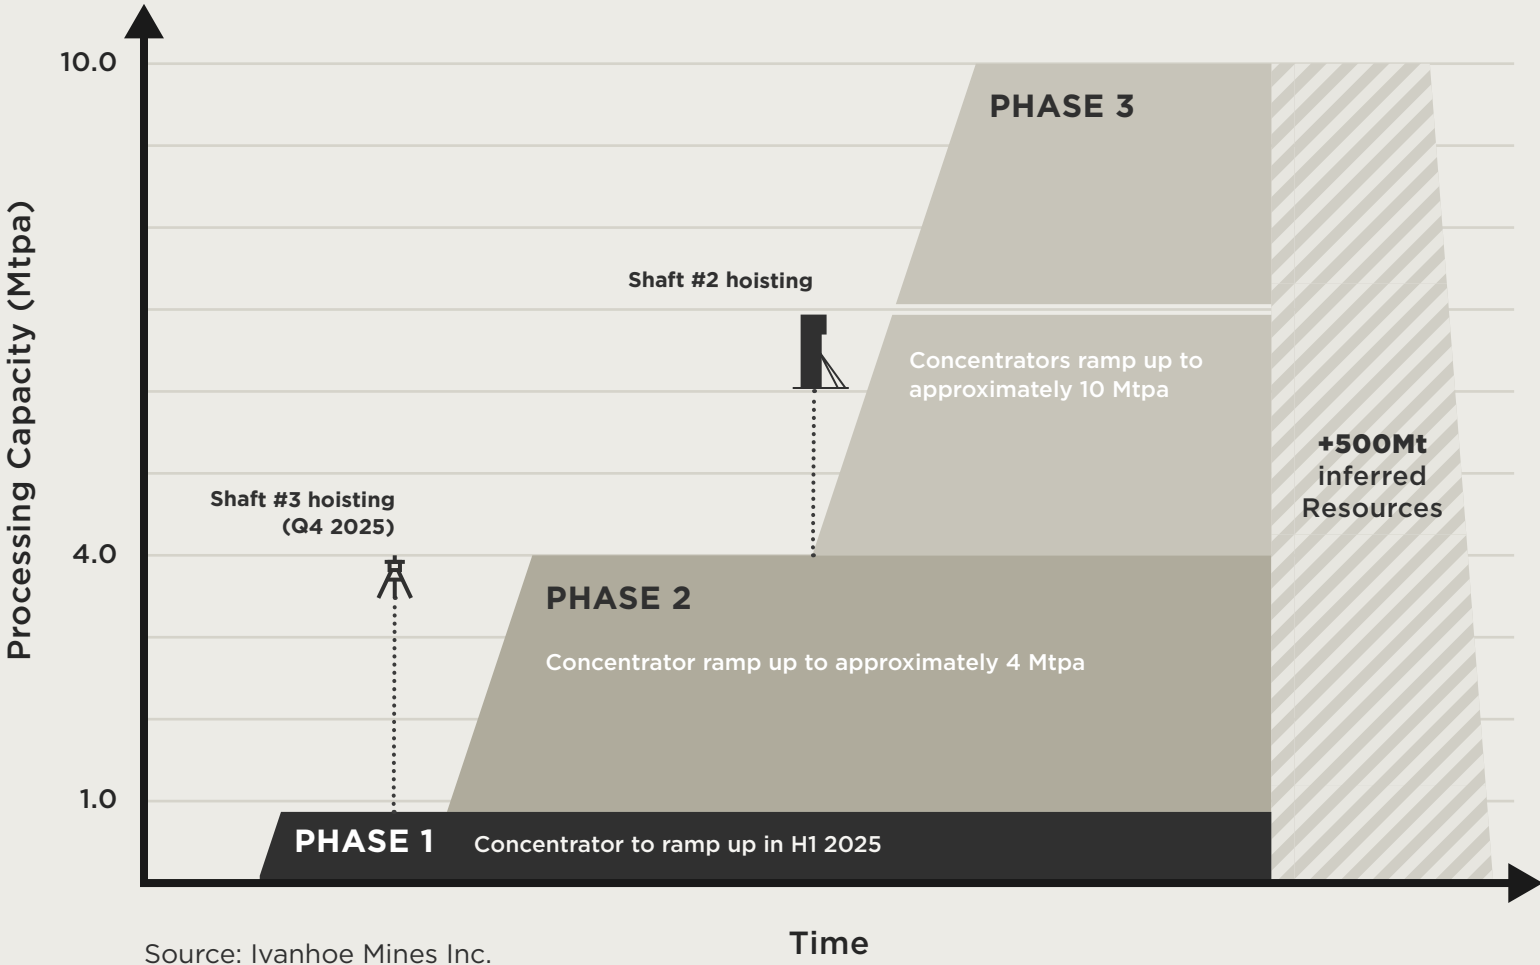

Platreef

Ivanhoe Mines Ltd.

Building the world's largest PGM mine

- › Multi-phase ramp-up to reduce risks
- › Industry disruptor—safe, mechanized and highly productive mining
- › Highest-margin and lowest cash cost PGM mine globally

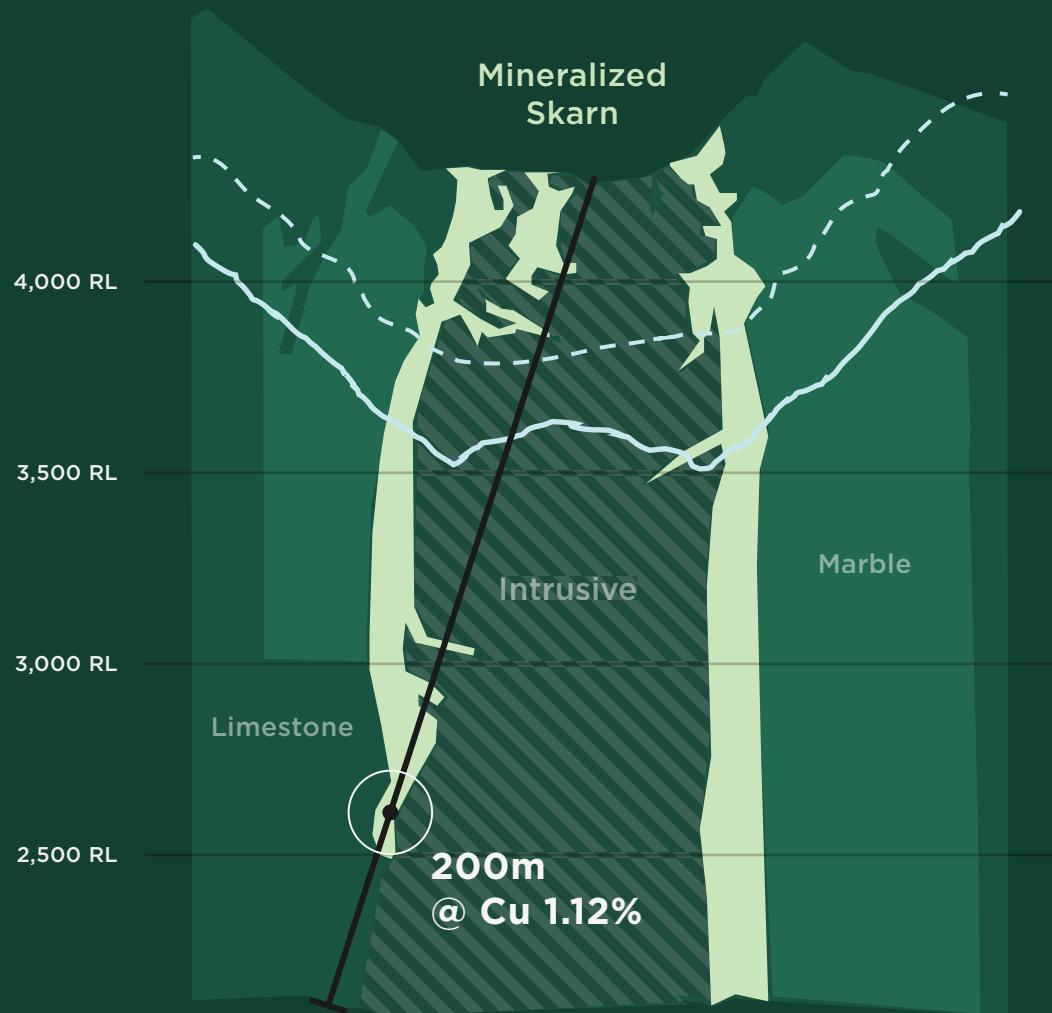

ANTAMINA INDICATIVE CROSS SECTION

--- Reserve Pit

— Resource Pit

Source: Teck Resources; Franco Nevada. Topography shown prior to 2001 commercial production. Pit shells reflect reserve and resource estimates as at Dec 31, 2014. Measured and Indicated Resources, inclusive of Reserves, total 900Mt, effective December 31, 2023. Proven and Probable Reserves were 226Mt, effective December 31, 2023 (Source: Glencore plc).

Antamina

Compañía Minera Antamina SA

Expanding the World's 3rd Largest Copper Mine¹

Antamina was granted approval of the MEIA* Study in February 2024²

- › \$2 billion, 8-year investment in mine optimization and expansion, extending mine life to 2036 and beyond
- › Extends permitted pit depth by 150m, allowing operations through 2036
- › Permits consider potential expansion to 208ktpd (from ~150ktpd)

* Modification of Environmental Impact Assessment

1. S&P Global: 2023 actual production of top global copper mines on a copper equivalent basis
2. See Compañía Minera Antamina SA's press release dated Feb 15, 2024 and Teck Resources' press release dated Feb 21, 2024.

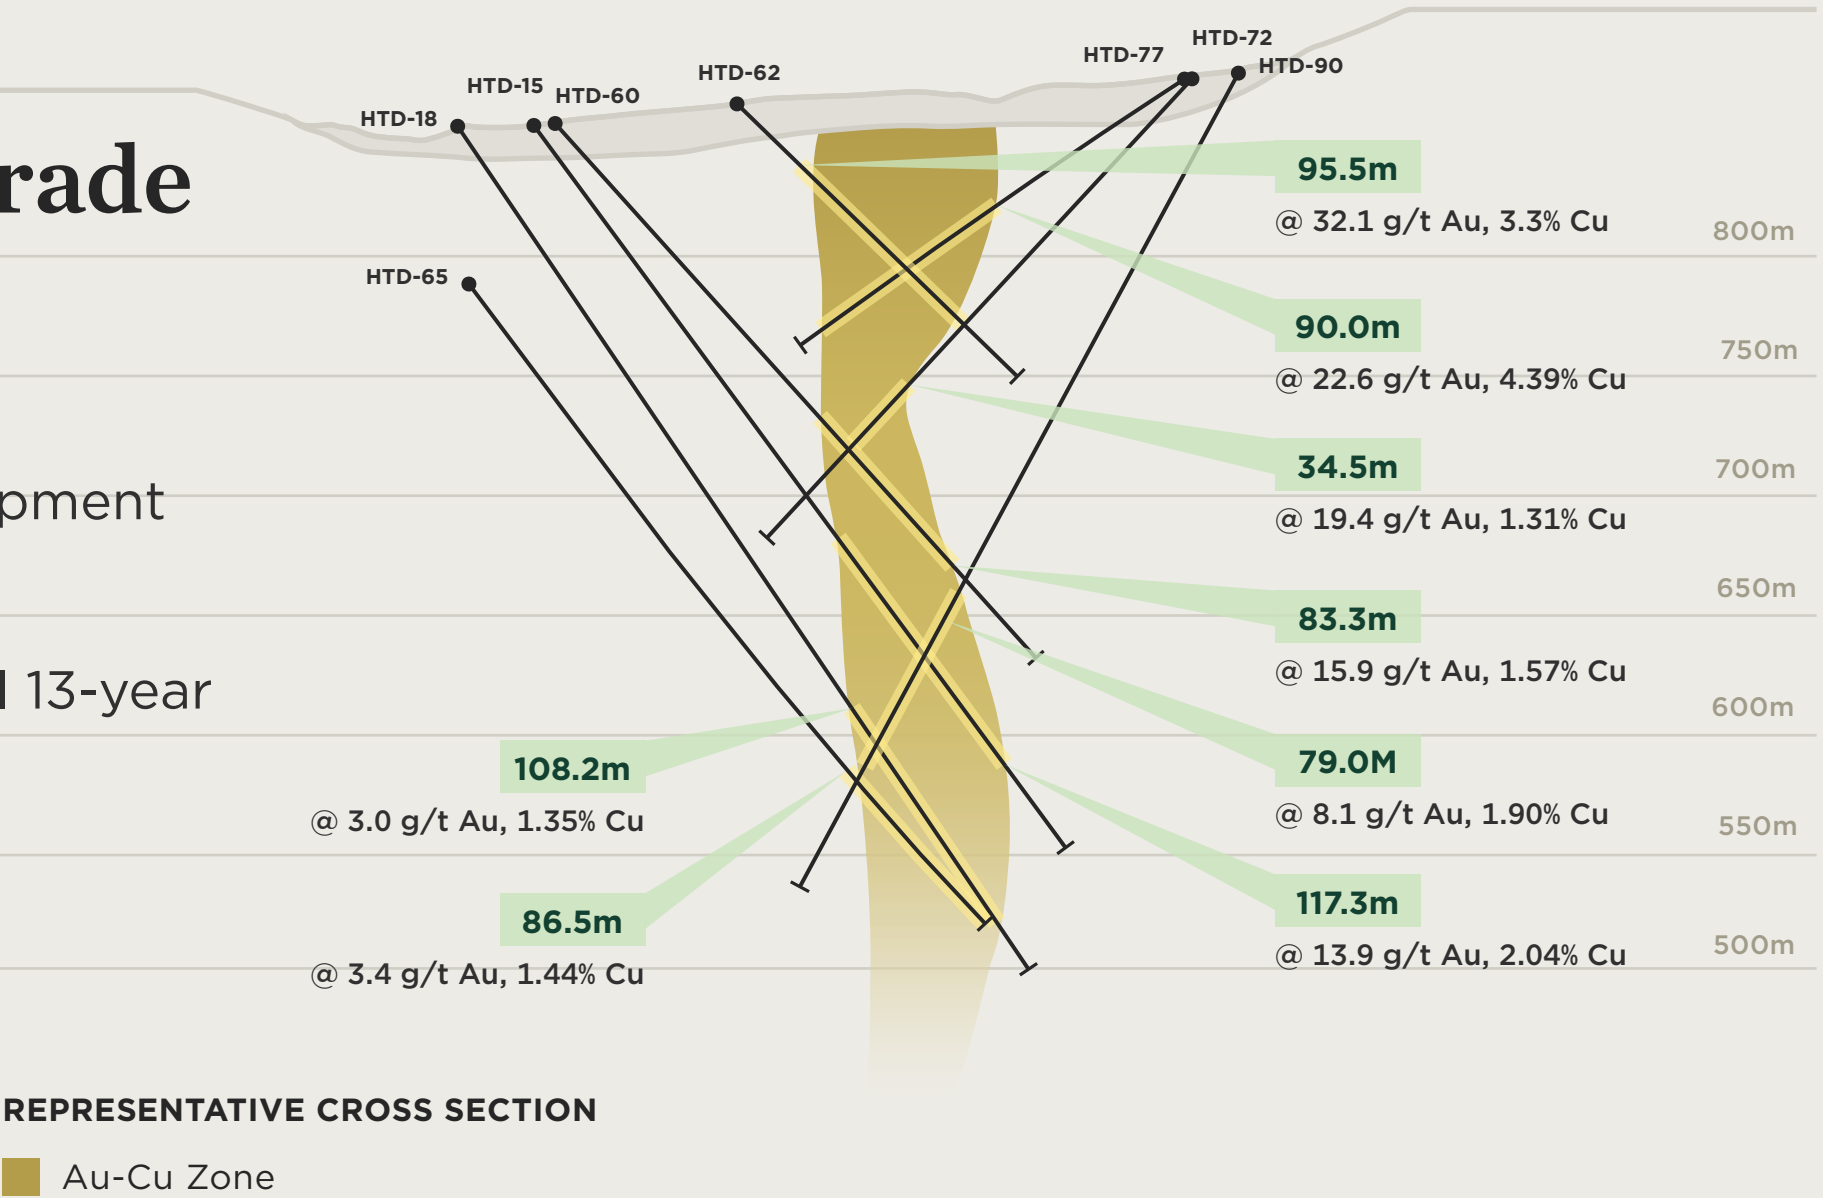

Hod Maden

SSR Mining Inc.

Unparalleled high-grade gold-copper project

- › High-grade gold-copper development project
- › 2 million ounces gold over initial 13-year mine life¹
- › Permitted for construction with early works underway

1. Refer to 2021 Hod Maden Feasibility Study.

Glencore plc

“A low capital intensity, long-life, good grade copper project.”

—Gary Nagle, *Glencore CEO & Director*

MARA

Exclusive Gold Stream Option

- › Adds 20k GEOs average per year¹
- › \$30M average annual cash flows¹
- › Purchase price of \$225M
- › 28-year reserve life²

1. Expected cash flows and attributable production based on gold price assumption of \$2,100/oz. MARA stream option is subject to conversion decision and contractual payment.
2. See 2022 Feasibility Study

MARCH 2024

GOLD 247

WHAT IS GOLD 247?

The World Gold Council's strategic vision for transforming the global gold market gold and elevating gold into the mainstream of financial markets. The initiative will ultimately enable greater participation, increase trust and unlock greater demand.

WHY NOW?

Gold has a systemic role in the world's economy—as an investment, a reserve asset, a source of employment and more. The way gold is traded and supply chain management needs to modernise so the industry continues to meet the expectations of all end-users and stakeholders.

INITIATIVES

Gold Bar Integrity Programme

- WGC/LBMA pilot
- Distributed ledger (blockchain) technology
- Foundation for a more accessible and fungible market

Accessible to all

- Enabling a digital transformation
- Removing barriers and establishing modern market infrastructure
- Essential to modernise and improve accessibility

Fully fungible

- Addresses barriers to trading gold across markets
- Intent is to establish a global standard
- In time, this will allow gold to be effectively traded as a digital asset
